

I urge you to pass BILL 5285, to educate our children about CLIMATE CHANGE. They need to be aware of what they are coping with, what we have left them--regardless of their race, financial status, political associations of parents, religion, or any other descriptor. They each and all face the same challenge of Earth's climate change, and they need to know what that challenge is and how to survive.

Thank you,  
Gloria Long
